4. Factories subordinate to the Ministry for Metallurgy and Machine Industry.

a. The following lists of factories are attached to this report as annexes:

- (1) Factories producing armaments only, annex A (not exhaustive).
- (2) Factories producing other products as well as armaments, annex B.
- (3) Factories of national importance for fulfilling the investment plan or for exports, annex C.

b. Except in the case of armaments, none of the above factories produces the same article, the lines of manufacture having been allocated so that each line is produced only by one works. In cases where formerly more than one small factory was manufacturing the same or a similar article, concentration was carried out. Only in the case of lathes is more than one works engaged in manufacture, but here also the production of different types is being increasingly allocated to different works. The vulnerability of this system in case of war is not heeded, because in the eyes of the planners civilian needs are of no importance and Hungarian industry is considered only as a unit of the Soviet-Bloc war potential.
